

TRAILBLAZER

CHEVROLET

***CHEVROLET TRAILBLAZER
A PREMIUM AMERICAN 7-SEAT
SUV FOR EVERY LIFESTYLE
READY TO MAKE THE JOURNEY
OF SUCCESS WITH YOU.***

Trailblazer features the superior power and fuel efficiency of the latest Duramax turbo diesel engine technology.

It offers a smooth driving experience with perfectly-balanced handling making you at one with this perfect lifestyle vehicle.

The exterior is characterized by unique design elements while the rich materials and elegant interior with spacious room and comfortable cabin are well-equipped with superior features and advanced technology. All of this combines to offer you real driving pleasure.

Above all, you can be at ease with full safety systems and innovative equipment which were developed by utilizing the latest and most advanced technology.

***CHEVROLET TRAILBLAZER
NEVER LOSE YOUR DRIVE.***

INTERIOR DESIGN

Experience the next level of driving comfort in the Trailblazer, a leader in its class. The spacious cabin is meticulously crafted to the highest ergonomic standards using the most luxurious materials.

The use of high quality leather adds to the elegant style of the interior, and of course modern luxuries are there in the form of premium technology such as the Chevrolet MyLink Infotainment System, Navigation

System, Steering Wheel-Mounted Audio and Phone Controls, Cruise Control, Rear Seat Climate Control, 6-way Electronically Adjustable Driver Seat and a 7-speaker Premium Sound System. There are many

different seating combinations so you can adjust the space inside the cabin for individual needs.

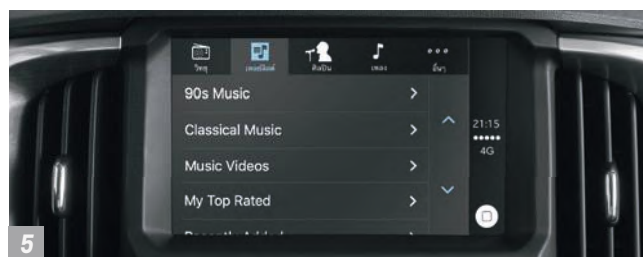

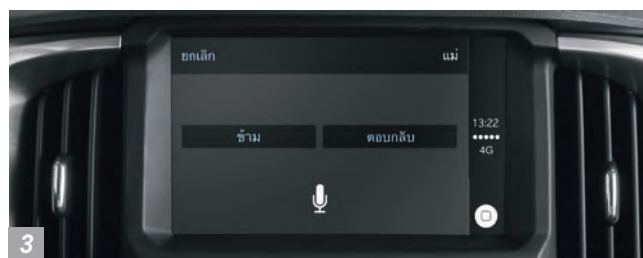

As you would expect in a real 7-seat SUV, the cabin of the Trailblazer provides plenty of seating variations to support every need.

1-2. The second-and third-row seats are adjustable for various formats. The backrest of the second-row seats can fold 60:40. In addition, the second and third rows of seats can be folded to create a perfectly flat loading area that can easily handle golf bags or folding bicycles for all your weekend activities.

Moreover, our engineering team has ensured that even with all seats fully deployed, third-row passengers can enjoy unprecedented comfort and safety with full 3-point seat belts

TECHNOLOGY

*The Trademark of Apple and iPhone is the copyright of Apple Inc. of the United States of America and supporting countries. Apple CarPlay™ system is copyrighted by Apple Inc. Apple CarPlay™ is compatible with iPhone as noted in www.apple.com/ios/carplay/

The Chevrolet MyLink infotainment system has been developed using the latest technology. It features a variety of intelligent functions whether you want to check the news on your favorite radio channels or watch popular TV series via AUX or USB inputs. You can also view your photos from a slide show album. When you receive a call, the system will automatically switch to calling mode. The system is easily controlled via a touch-screen and a convenient voice recognition feature that lets you keep your hands on the steering wheel for a safer journey.

Additionally, Trailblazer is the first premium SUV in its segment to offer phone integration through Apple CarPlay™.

1. Apple CarPlay™ The smart and safer way to use your iPhone when driving. Key functions of your iPhone will be displayed on the touch-screen, allowing you to make calls, read, write and send SMS messages, listen to music from your library or use any other applications on your iPhone.

2. Siri® A virtual personal assistant that travels with you everywhere. You can command Siri on your iPhone to perform your desired function by using your voice in a variety of languages, including Thai.

3. Messages By using your Siri® voice command, you can receive and send messages as well as ask Siri® to help you read and type your message without looking at the screen when driving.

4. Phone Stay in touch and in control when answering or declining a call. Return a missed call or listen to voicemail without taking your hands off the steering wheel.

5. Music Stream and select your favorite songs from the library on your iPhone or ask Siri® to search for a new song on Apple Music.

PERFORMANCE

The Duramax engine is developed with advanced automotive technology and features a balance of power, fuel efficiency and environmental friendliness. It delivers superior driving performance while offering functional usability and comfort.

1. 2.5L Duramax Turbo Diesel Engine Break new ground with the 2.5L Duramax diesel direct injection engine featuring 4 cylinders, 16 valves, DOHC with Variable Geometry Turbocharger (VGT) and intercooler delivering 180hp @3,600rpm and 440Nm of torque @2,000rpm.

2. Electric Power Steering The Electric Power Steering is highly precise and accurate. Steering weight varies according to the car's speed.

- At low speed (driving in a traffic jam or when parking) The steering feels lighter to give you better ease of drive.
- At high speed (driving on highway) Steering gradually feels heavier as you increase speed. This enables you to steer firmly with more stability. In addition, control and handling is improved to help you avoid accidents.

3. 6-Speed Automatic Transmission with Manual Mode Fun This automatic transmission offers a combination of convenience and driving excitement. The driver can choose to have more control over gear changes for driving dynamics similar to a conventional manual transmission.

In addition, you can select either 2WD or 4WD to suit the terrain. On the road or off road it, you can just switch between 4WD and 2WD modes with the 4WD Control Switch next to the gear lever.

4. Remote Start The remote start is a key feature that lets you start the engine from outside the car. It even allows you to turn on the air conditioning automatically at 25°C. Furthermore, you also have remote control of all 4 electrically adjustable windows.

Remark: Standard equipment is different according to models. Please refer to the back cover of this brochure for more information.

SAFETY

Enjoy confidence in safety in Chevrolet Trailblazer which has a combination of active and passive safety features to maximize protection for all occupants in the event of an accident.

1. Rear Cross Traffic Alert Assist you to back out at ease from a parking space. When the driver shifts gear into reverse, the radar sensor detects movement behind the vehicle. If another vehicle drives into the radar area from right to left, a signal sound alerts the driver together with a warning symbol appearing on the center console screen.

2. Side Blind Zone Alert With radar sensors on both sides of the vehicle, Side Blind Zone Alert helps to “look” for other vehicles through your side mirror blind zones and indicates what you can’t see with LED-lit symbols displayed on the exterior mirrors.

3. Lane Departure Warning If you move out of your lane without using the indicator at speeds of 60km/h upwards, the system immediately provides audible and visual alerts to warn you. However, the traffic lane must be visually identifiable for this function to work flawlessly.

4. Forward Collision Alert At speeds of 40km/h upwards, a camera mounted on the rear view mirror along with a front sensor analyzes and evaluates the distance between your vehicle and the vehicle in front. If you get too close to the vehicle in front, the system immediately provides audible and visual alerts. These warnings can alert you of any impending collision with a slower moving or stationary car in front of you.

Remark: Standard equipment is different according to models. Please refer to the back cover of this brochure for more information.

Remark: Standard equipment is different according to models. Please refer to the back cover of this brochure for more information.

5. HSA - Hill Start Assist It works to stop the vehicle from rolling back when on a steep incline. When the driver moves his foot from the brake pedal to the accelerator, it helps stabilize the vehicle by holding it stationary for up to 3 seconds.

6. HDC - Hill Descent Control This prevents the vehicle from running out of control on a steep slope by constantly controlling the speed.

7. Tire Pressure Measuring System The system will alert the driver immediately if any wheel does not have the proper tire pressure.

8. Rear Vision Camera When the gear lever is in reverse, a wide angle view of the area behind the vehicle appears on the 8-inch touch-screen. Dynamic guide line technology operates in real time to help you back into tight spaces with ease.

In addition, there are many advanced technologies such as Anti-Rolling Protection and TSC - Trailer Sway Control. The built-in sensor in these systems will assess the driving situation at all times. It works when the vehicle is losing stability and there is a risk it may roll over. The Electronic Stability Control (ESC) co-operates with the Traction Control System (TCS) including the Anti-lock Braking System (ABS) and Panic Brake Assist (PBA) to resolve the emergency situation automatically and stabilize the car properly in a split second.

9) Safety Cage Chevrolet utilizes high-strength steel and other alloys in our vehicle structures in order to maximize protection without sacrificing weight, performance and efficiency. These high-strength steel safety cages help absorb and channel crash impact energy and direct it away from the cabin and its occupants. The side impact beams, the dual SRS airbags and driver's knee airbag, adjustable 3-point seat belt pretensioner and load limiter as well as other safety features will work consistently to minimize damage from any dangers.

SPECIFICATIONS AND FEATURES

MODEL	LT A/T 4x2	LTZ A/T 4x2	LTZ A/T 4x4
ENGINE			
Engine Code	LP2		
Engine Type	Diesel Double Overhead Camshaft (DOHC), 16 Valves, Straight 4 Cylinders with Variable Geometry Turbo (VGT) and Intercooler		
Fuel System	Common Rail Direct Injection
